DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, 17-33, 43-51 and 63-65, drawn to a method and a system for redirecting a call(s) from a data processing system to another address, classified in class 455, subclass 445.
 - II. Claims 9-16, and 34-42, drawn to a computer program product in computer readable media for use in a data processing system, classified in class 712, subclass 200+.
 - III. Claims 52-62, and 66-69, drawn to a communication system and its method for processing and/or initiating a call including registration processes, classified in class 455, subclass 435.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions I, II and III are related as combination and subcombinations. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because invention I refers to a method and a system for redirecting a call(s) from a data processing system to another

Art Unit: 2684

address for routing calls. The subcombination has separate utility whereas invention II is about a computer program product in computer readable media for use in a data processing system for redirecting a call(s) from a data processing system to another address; and invention III is different from invention I & II for a communication system and its method for processing and/or initiating a call including registration processes. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II & III, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
